

Personal Glossing Notes

Use these strips to personalize and enrich any reading. The use of glossing notes will reinforce thinking as students record their learning in the course of the reading. This is a critical component for many students.

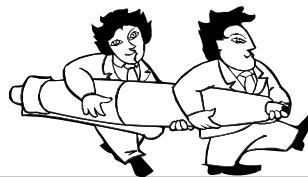

Duplicate this page to cut the strips apart. Each child is given a strip to insert into the margin of a text using a paper clip. Students will now easily record personal notes using key words and visuals on the strip during the reading. The strips is easily moved through the book. A new strip is inserted as needed.

Collaboration is the essential piece of the glossing technique. Be sure to provide ample time for sharing notes with peers to compare and modify notes as appropriate. Sharing with several peers will reinforce learning as students view learning through new eyes with each partner.
